SUMMARY

Final-year B.Tech in Computer Science & Engineering student with hands-on software development experience in Java, Spring Boot, FastAPI, and React, plus CCNA networking fundamentals from a Cisco-AICTE virtual internship. Built three end-to-end projects spanning backend service development, REST API design, and a vanilla-JS collaborative whiteboard, a Spring Boot movie recommendation service, and NetSage AI, a network troubleshooting platform with mandatory human review. Solved 150+ Data Structures & Algorithms problems on LeetCode, reached a max contest rating of 1480, and bring strong problem solving, technical writing, and version control habits to maintainable code delivery. Graduating July 2027.

SKILLS

Java, Python, JavaScript, SQL, Spring Boot, FastAPI, REST API Design, JWT Authentication, React, HTML5, CSS3, Tailwind CSS, MySQL, PostgreSQL, MongoDB Atlas (NoSQL), Routing, Switching, VLANs, OSPF (CCNA 1-3 fundamentals), Git/GitHub, Postman API Testing, DSA, OOP, LangChain, Generative AI (LLM Fundamentals), Prompt Engineering, LangChain Agents, Conversational Memory, LLM Tool/API Integration, OpenAI API, Streamlit, RAG (Retrieval-Augmented Generation)

PROFESSIONAL EXPERIENCE

Intern

Cisco Networking Academy — Remote | May 2026 - Jul 2026

- Applied version control discipline and technical problem solving in Packet Tracer labs by modeling multi-router topologies and validating service behavior.
- Architected NetSage AI as the internship capstone in a 2-3 member team.
- NetSage AI diagnoses network faults across VLAN, DHCP, DNS, routing, ACL, NAT, and wireless issues from symptom reports and show-command evidence, improving service triage.
- Enforced a mandatory human-review responsibility before any diagnosis is applied as a fix, adding a safety gate to the service workflow.
- Validated the dashboard against 33 test cases across 8 fault categories while a teammate implemented the AI diagnosis and prompt layer.

EDUCATION

Associate of Science in Computer Science & Engineering | CGPA - 7.37

Kalinga Institute of Industrial Technology — Kolkata | Jul 2027

Coursework - Class XII: 65%, Class X: 75%

CERTIFICATIONS AND TRAINING

Cisco CCNA: Introduction to Networks, Cisco CCNA: Switching, Routing, and Wireless Essentials, Cisco CCNA: Enterprise Networking, Security, and Automation, Python Essentials 1, Python Essentials 2, Cisco + AICTE Virtual Internship Certificate of Completion

PROJECT EXPERIENCE

Real-Time Collaborative Whiteboard [Live Demo](#)

Engineered a vanilla JavaScript whiteboard application without external drawing libraries, emphasizing clean programming and maintainable code. Organized the codebase into 6 modular files totaling 790 lines of code to improve maintenance and versioning. Implemented 5 core features: multi-colour pencil, adjustable-size eraser, sticky notes, image insertion, and board export for a better user experience.

GenAI / LangChain Projects —

1. Q&A Chatbot with Conversation Memory — Built a chatbot using LangChain and Streamlit that remembers previous messages in a conversation.
2. AI Blog Generator — Built a 3-step LLM pipeline using LangChain (outline → draft → polished blog) to generate blog content.
Google Search + Weather Agent — Built a LangChain agent that uses Google Search and a weather API to answer real-time queries.
3. Gmail Email Agent — Built an agent that drafts and sends emails through Gmail based on natural language requests.
4. SQL Task Manager Agent — Built an agent that manages a to-do list stored in SQL using natural language commands.

Faculty Review System [Live Demo](#)

Built a full-stack faculty review platform in a 2-member team, owning the FastAPI backend service, frontend, and PostgreSQL database design. Designed REST APIs for review submission and retrieval with a focus on clean framework integration and service reliability. Added JWT-based authentication and email verification to prevent duplicate or fraudulent reviews and strengthen maintenance of platform

integrity. Integrated a teammate's LLM-powered review-analysis feature into the core REST API, coordinating technical design decisions end to end.

LANGUAGES

Java, Python, JavaScript, SQL
